

# GEOGRAPHY - YEAR 7 - LEARNING JOURNEY 2023- 2024

Week	Date	Key Constructs being studied during the unit of study:	AOS	Assessment	
1	04.09.23	1. Ecosystems contain (biotic) plants and animals that have adapted to live in their non-living (abiotic) environment	7.1 Ecosystems		
2	11.09.23	2. The relationship between the living and non-living components within an ecosystem is called interdependence			
3	18.09.23	3. Global biomes are large-scale ecosystems that cover the surface of Earth			
4	25.09.23	4. Food chains/webs follow the flow of energy from producers to consumers and onto decomposers that recycle nutrients			
5	02.10.23	5. The UK's native ecosystem is temperate deciduous woodland			
6	09.10.23	6. Hot tropical deserts are located in broken belts around the Tropics			
7	16.10.23	7. Tropical rainforests are located in broken belts around the Equator			
8	30.10.23	1. The African continent has a range of tropical biomes	7.2 Population	Data drop	
9	06.11.23	2. The relief (shape of the land) of Africa influences climate and land use			
10	13.11.23	3. Historical events (colonialism) have shaped modern Africa			
11	20.11.23	4. Hunter-gatherers are still present in Africa (the Akie people of Tanzania)			
12	27.11.23	5. Lagos city, Nigeria, is experiencing rapid urbanisation			
13	04.12.23	6. Employment structures change over time (Nigeria Example)			
14	11.12.23	7. The Middle East is an area with a high concentration of NEE countries			
		1. Resources are anything that we use to meet our wants and needs	7.3 Rivers		
15	02.01.24	2. Food, Water and Energy are unevenly distributed, yet essential resources for life			
16	08.01.24	3. Desertification is the process of land degradation to the point of ecological failure			
17	15.01.24	4. Deforestation is the removal of trees from forested areas for use or making space for other activities			
18	22.01.24	5. Ocean health is essential for the natural systems of Earth			
19	29.01.24	6. Human activities are changing the climate on Earth			
20	05.02.24	7. Climate change has consequences for natural systems			
		8. Humans are adapting and mitigating against environmental issues			
21	19.02.24	1. The British Isles is a group of islands off the northwestern coast of Europe	7.4 Weather & Climate	Data Drop	
22	26.02.24	2. The United Kingdom is union of the three countries on the island of Great Britain (England, Scotland and Wales) and the province of Northern Ireland (on the island of Ireland).			
23	04.03.24	3. The relief (shape of the land) of Great Britain is uneven - with upland areas dominating the west and north.			
24	11.03.24	4. The population of Great Britain is unevenly distributed - with major concentrations in the central and south-eastern regions.			
25	18.03.24	5. The UK has a temperate climate - mild and wet.			
26	27.03.24	6. The UK is an important, developed country with links to the rest of the world			
		7. The employment structure in the UK has changed to a post-industrial economy			
27	17.04.24	<b>Exam Prep</b>	Annual Exam Season		
28	24.04.24	<b>Exam prep</b>			
29	02.05.24	<b>Annual Exams</b>			
30	08.05.24	<b>Annual Exams</b>			
31	15.05.24	<b>Annual Exams</b>			
32	22.05.24	<b>RAP/ addressing misconceptions</b>			
33	05.06.24	1. The tourism industry has become increasingly important from a local to global scale	7.5 Tourism	Data Drop	
34	12.06.24	2. Global tourism has increased for a combination of social, economic and technological reasons			
35	19.06.24	3. Tourists (visitors) are attracted to destinations with any of the '6xSs' (sun, sea, sand, snow, scenery, social)			
36	23.06.24	4. The UK's National Parks preserve landscapes and provide access for public enjoyment			
37	03.07.24	5. Tourism in National Parks brings both positive and negative impacts			
38	10.07.24	6. Tourism in fragile environments requires sustainable management			
39	17.07.24	Activities Week
