

# GEOGRAPHY - YEAR 9 - LEARNING JOURNEY 2023- 2024

Week	Date	Key Constructs being studied during the unit of study:	AOS	Assessment
1	04.09.23	1. Geological timescales represent the history of Earth recorded in rock layers made over the last 4 billion years	9. 1 Physical Earth	
2	11.09.23	2. The crust of Earth is made of igneous, sedimentary and metamorphic rock		
3	18.09.23	3. Soil is the essential (for life) top layer of the Earth's surface typically comprised of organic matter, clay and rock particles		
4	25.09.23	4. The climate of Earth changes due to natural processes over geological time		
5	02.10.23	5. Glaciation is the process of increased ice coverage due to a cold climate phase		
6	09.10.23	6. Glaciers slowly erode the landscape in mountainous or high latitude locations		
7	16.10.23	7. Glaciers create erosional landforms in upland areas.		
8	30.10.23	1. The African continent has a range of tropical biomes	9. 2 Africa Case Study	Data drop
9	06.11.23	2. The relief (shape of the land) of Africa influences climate and land use		
10	13.11.23	3. Historical events (colonialism) have shaped modern Africa		
11	20.11.23	4. Hunter-gatherers are still present in Africa (the Akie people of Tanzania)		
12	27.11.23	5. Lagos city, Nigeria, is experiencing rapid urbanisation		
13	04.12.23	6. Employment structures change over time (Nigeria Example)		
14	11.12.23	7. The Middle East is an area with a high concentration of NEE countries		
15	02.01.24	1. Resources are anything that we use to meet our wants and needs	9. 3 Resources and Issues	
16	08.01.24	2. Food, Water and Energy are unevenly distributed, yet essential resources for life		
17	15.01.24	3. Desertification is the process of land degradation to the point of ecological failure		
18	22.01.24	4. Deforestation is the removal of trees from forested areas for use or making space for other activities		
19	29.01.24	5. Ocean health is essential for the natural systems of Earth		
20	05.02.24	6. Human activities are changing the climate on Earth		
		7. Climate change has consequences for natural systems		
		8. Humans are adapting and mitigating against environmental issues		
21	19.02.24	1. The British Isles is a group of islands off the northwestern coast of Europe	9. 4 UK Case Study	Data Drop
22	26.02.24	2. The United Kingdom is union of the three countries on the island of Great Britain (England, Scotland and Wales) and the province of Northern Ireland (on the island of Ireland).		
23	04.03.24	3. The relief (shape of the land) of Great Britain is uneven - with upland areas dominating the west and north.		
24	11.03.24	4. The population of Great Britain is unevenly distributed - with major concentrations in the central and south-eastern regions		
25	18.03.24	5. The UK has a temperate climate - mild and wet.		
26	27.03.24	6. The UK is an important, developed country with links to the rest of the world		
		7. The employment structure in the UK has changed to a post-industrial economy		
27	17.04.24	<b>Exam Prep</b>	Annual Exam Season	
28	24.04.24	<b>Exam prep</b>		
29	02.05.24	<b>Annual Exams</b>		
30	08.05.24	<b>Annual Exams</b>		
31	15.05.24	<b>Annual Exams</b>		
32	22.05.24	<b>RAP/ addressing misconceptions</b>		
		<b>RAP/ addressing misconceptions</b>	9. 5 Enquiry Skills/GCSE Prep	Data Drop
33	05.06.24	A04 SKILLS Understand the geographical enquiry process		
34	12.06.24	A04 SKILLS Risk assessment and mitigation		
35	19.06.24	A04 SKILLS Methodology and data collection		
36	23.06.24	A04 SKILLS Graphicacy skills and data presentation		
37	03.07.24	A04 SKILLS OS Maps and satellite imagery interpretation of urban areas		
38	10.07.24	A04 SKILLS Data Interpretation and Analysis		
		A04 SKILLS Applied mathematics (statistical averages) - mean, median modes, interpolation and extrapolation		
		A04 SKILLS Concluding and evaluation an enquiry		
39	17.07.24	Activities Week
