Art Key Constructs

Art history explores how humans have created art and the development of this across art, design and architecture globally, which underpins how we make art today.

Artists are a source of inspiration when creating your own work.

There are many coloured materials/mediums that are used to create art work.

Composition is how artwork is organised in a space to achieve different effects.

Experimenting with materials is part of the creative process and helps with designing an outcome.

Designing is the process where you explore your ideas for a piece of work and document this.

Refining your designs will involve exploring and experimenting with materials and learning from this process.

All colours can be made/mixed using the primary colours and black and white.

Drawing is the foundation of all art. It is made up of line, tone and mark making.

Painting is the application of paint to a surface, it requires fine motor skills and an understanding of colour theory.

Photography can be used to record or document work and ideas.

Sketchbooks are used to document the creative process.

Annotation helps to document the creative journey with use of visual language.

Art can be created in 3d form known as sculpture.

Final outcomes are produced as a result of the creative process and should demonstrate the best work explored.

Evaluations at the end of a project help you reflect on the creative process and learn from it.
